## ENRON CORPORATION

## 3Q of \$0.27/Share In-Line with Expectations

Hugh F. Holman (617) 526-7437 hugh_holman@rsco.com

## Key Points:

- Enron reported 3Q earnings of $\$ 0.27$ per share versus our estimate of $\$ 0.28$. Net income of $\$ 223$ million was dead-on with our estimate of $\$ 220$ million, and revenues of $\$ 11.8$ billion slightly outran our estimate of $\$ 11.4$ billion. All in all, in our view, another solid quarter, and nothing in the numbers or management's comments would suggest anything awry in Enron's current business model relative to the markets that it serves. We maintain our "Buy" rating on this stock.
- We agree with what we believe is Enron's view of the domestic power market: rapidly opening to competition, likely to remain highly volatile in the near-term due to capacity and transmission constraints, very likely to be overbuilt at some point in the future, and exposed to potential increases in the price of natural gas. We believe the key to success in the new power market is flexibility, and we view Enron, with its investments in real options throughout the energy value chain, as being among the most nimble and adaptable of the new energy providers.
- We are establishing quarterly earnings estimates for the year 2000 ( $\$ 0.30, \$ 0.32$, $\$ 0.35, \$ 0.38$ ) that ramp smoothly to our full year estimate of $\$ 1.35 /$ share; for the year 2001, we are setting a point estimate of $\$ 1.55 /$ share. The key elements to that projection are a $14.9 \%$ increase in IBIT from Wholesale Energy Operations and Services to $\$ 1.64$ billion and IBIT from Retail Energy Services of $\$ 124$ million (see model for full details).

## 3Q Recap

The company's press release speaks for itself. On the conference call, the following additional information came out:

- Retail Energy Services- Produced its best quarter yet. Still on track for cash and earnings positive results in 4Q. Signed contracts covering $\$ 2.5$ billion of energy expenditures in 3Q 1999 versus $\$ 850$ million in 3Q 1998. Expect to beat the forecast of $\$ 8$ billion in contract signings for full year. Contracts that are coming in are weighted toward full outsourcing agreements with high service content, which puts them at the high end of the $6-10 \%$ margin range expected in this business.
- Domestic power- Tight, volatile market in 3Q. Trading volumes down, again reflecting contraction in activity generally this year versus last. Company's peaking plants in Midwest were able to take advantage of tight markets and were very profitable in 3Q. Three plants with a total of 1,500 MW of additional peaking capacity are under development or in construction (TN, IN, IL). Another 3,500 MW of peaking capacity is in early stage development.
- European power- Trading activity continues to rise, with 9,100 transactions in 3 Q , a threefold increase over last year's 3 Q . UK market is tight, in part because UK has halted construction of new gas-fired plants (anything to keep the coal miners happy). Enron would like to build capacity, but is stuck until the gas ban is lifted. Continental market is in oversupply, and Enron looking for selective acquisitions.
- Other international energy- Good momentum, as projects coming on-line added to 3Q results and additional projects in construction are expected to contribute in coming quarters. Will reinvest proceeds from Enron Oil and Gas (EOG) deal in energy projects. EOG assets in India and China will be folded into Wholesale Energy Operations and Services, adding $\$ 10$ million/quarter to IBIT.
- Telecommunications- Very optimistic about the trading potential in bandwidth. Expect to see first transactions in 1Q or 2Q next year. Want to minimize own capital investment in fiber, which company believes will be in oversupply. Want to build position in proprietary software and will invest $\$ 300-400$ million/year.
- Forecast-Company is in planning process for year 2000; should have additional guidance on numbers at end of this process (early November?).

## The Company and Investment Thesis

Enron is an integrated global energy company. Its operations span the production of natural gas and oil; the transmission and distribution of natural gas; the generation, transmission, and distribution of electricity; wholesale trading of energy in all forms; and retail sales of energy and of services associated with retail energy use. Approximately $80 \%$ of Enron's revenues derive from its domestic businesses; its international operations are principally in Europe, South America, and Asia. In 1998, the company reported revenues of $\$ 31.3$ billion and net income of approximately $\$ 700$ million.

We view Enron as the premier, large-cap play on the deregulation and restructuring of the electric utility industry in the U.S. and Europe. In our view, the opportunities created by this restructuring are substantial (see our April 12, 1999 report Rejoice Re: Juice Redux). In addition, Enron has established itself as a leading force in other international power markets, where privatization is allowing new entry.

## Investment Risks

Among the risks faced by Enron are risks associated with the company's construction of new power plants and other energy projects: the cost to construct, time to complete, and operating characteristics of the projects once complete all represent potential sources of risk. Enron's strategy has been to build merchant peaking plants, thus exposing the company to the risks (and high potential rewards) of power sold to meet short-term and relatively unpredictable requirements. As the largest marketer of power, Enron faces trading risks. Enron hedges these risks to a significant extent. However, the electricity market is exceptionally volatile: A Federal Energy Regulatory Commission report noted that during June 25 and 26, 1998, spot prices for electricity in the Midwest rose from $\$ 25$ per megawatt hour to as much as $\$ 2,600$ per megawatt hour and reached as high as $\$ 7,500$ per megawatt hour at one point. Finally, Enron faces exposure to political risk in its international operations.

## FOR ADDITIONAL INFORMATION, PLEASE CONTACT YOUR ROBERTSON STEPHENS REPRESENTATIVE AT: BancBoston Robertson Stephens Inc. 555 California Street, Suite 2600 San Francisco, CA 94104

Unless otherwise noted, prices are intraday, Tuesday, October 12, 1999.

#### Abstract

BancBoston Robertson Stephens Inc. ("Robertson Stephens") is a wholly owned subsidiary of Fleet Boston Corporation and is an NASD member and a member of all major exchanges and SIPC.

The information contained herein is not a complete analysis of every material fact respecting any company, industry or security. Although opinions and estimates expressed herein reflect the current judgment of Robertson Stephens, the information upon which such opinions and estimates are based is not necessarily updated on a regular basis; when it is, the date of the change in estimate will be noted. In addition, opinions and estimates are subject to change without notice. This Report contains forward-looking statements, which involve risks and uncertainties. Actual results may differ significantly from the results described in the forward-looking statements. Factors that might cause such a difference include, but are not limited to, those discussed in "Investment Risks." Robertson Stephens from time to time performs corporate finance or other services for some companies described herein and may occasionally possess material, nonpublic information regarding such companies. This information is not used in the preparation of the opinions and estimates herein. While the information contained in this Report and the opinions contained herein are based on sources believed to be reliable, Robertson Stephens has not independently verified the facts, assumptions and estimates contained in this Report. Accordingly, no representation or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information and opinions contained in this Report. Robertson Stephens, its managing directors, its affiliates, and/or its employees may have an interest in the securities of the issue(s) described and may make purchases or sales while this report is in circulation. BancBoston Robertson Stephens International Ltd. is regulated by the Securities and Futures Authority in the United Kingdom. This publication is not meant for private customers.

The securities discussed herein are not FDIC insured, are not deposits or other obligations or guarantees of Fleet Bank or BankBoston N.A., and are subject to investment risk, including possible loss of any principal amount invested.

## Hugh F. Holman

Hugh Holman joined Robertson Stephens in 1998 as a senior equity analyst covering the environmental sector and the deregulation of the electric utility industry. Prior to joining the firm, he ran his own consulting firm, Environmental Capital Associates, Inc. Hugh has seven years of experience on Wall Street as an equity analyst, principally with Alex. Brown. Prior to joining Alex. Brown in 1989, Hugh was a management consultant with Putnam, Hayes \& Bartlett. He also worked for the U.S. Environmental Protection Agency, where he was the lead policy analyst for the Agency's hazardous and solid waste programs. In 1994, The Wall Street Journal recognized him as an All-Star pollution control analyst. He received his BA degree from Dartmouth College and his MBA from Stanford University.
